

Peer evaluation template

Use this form in the stated units of your module to assess your team members' performance, including your own, in the group/team assignments. This feedback will not be shared with your team members. However, it will be considered for your final grade for the unit assignments. The full guidance is on the Department page.

Name	Larussa Francesca
Group/Team number or name	Group D

Team evaluation

Write the name of each of your group members in a separate column. For each person, indicate the score to which you agree with the statement using the rating scale below. Extreme scores (1 and 5) will need to be justified with comments as they are reserved for extraordinary events (lack of participation or going above and beyond, respectively).

Rating Scale

- 1 - Did not contribute in this way
- 2 - Willing but not very successful
- 3 - Average
- 4 - Above Average
- 5 - Outstanding

Peer evaluation template

Evaluation Criteria	Team member: Lyth Hishmeh	Team member: Tamim Al-Mutawa	Team member: Hadeel Alshammari	Team member: Sarra Fadhl Mohamed Bin-hadda Alsuwaidi	Team member: Ariel Mella
Attends team meetings regularly and arrives on time.	2	1	1	5	5
Contributes meaningfully to team discussions.	2	1	1	3	5
Completes team assignments on time.	3	1	1	4	5
Prepares work in a quality manner.	4	1	1	4	5
Demonstrates a cooperative and supportive attitude.	2	1	1	4	5
Contributes significantly to the success of the project.	3	1	1	4	5

Feedback on team dynamics

Comment for 1 and 5 ratings, extraordinary events:

Individual contribution to justify the 1s ratings:

- **Tamim Al-Mutawa**

Tamim did not attend any team meeting. He sent some emails, but none of them can be considered a contribution to the team discussion or to the project. I cannot assess whether he carried out the work in an appropriate manner because he did not produce any documents that demonstrate his contribution. He only wrote an email in which he stated that the report (which was finalised by Ariel Mella) was good and ready for submission, without providing any suggestions for rephrasing or grammatical or linguistic improvements. Considering all these aspects, I assigned a rating of 1 to each category.

Peer evaluation template

- **Hadeel Alshammari**

Hadeel participated only in the last call, when the project was already completed and only required a final review that was assigned to Sarra. She asked for a task (but again, everything had already been completed, so the only option was to assign her to Sarra's task).

The team asked her to produce a tangible document to show that she had effectively contributed, but in the end, she only sent an email confirming that the final project was good and ready for submission (no evidence of rephrasing, grammatical correction, or formatting work).

To be completely transparent, it is important to highlight that she explained to us that she was unable to participate until the final meeting because she had technical issues with Google Drive and with emails, and she said that she had already informed the university. I also asked her to contact the professor and to inform her of her inability to participate, and she said that the professor was aware of it. In conclusion, assigning a rating of 1 may appear somewhat strict because of her technical issues, but I chose to remain objective and evaluate only the tangible contributions.

Individual contribution to justify the 5s ratings:

- **Sarra Fadhl Mohamed Binhadda Alsuwaidi**

Sarra participated on time for all meetings and was very accommodating regarding the choice of dates and times.

- **Ariel Mella**

I rate Ariel 5 across all categories because his work was excellent in every aspect. He was the one who contacted each person in the group to initiate collaboration within the team. He was always accommodating regarding the choice of dates and times, and he was always on time during the team meetings. He served as coordinator, was consistently cooperative and accommodating, and made himself available for one-to-one calls to address any questions or issues. Regarding his contribution to the project, there is clear evidence of his work. He delivered, within the agreed deadlines, both the regression and clustering tasks and the final report (which was subsequently only reviewed by Sarra), all of which were produced to a high standard. It is therefore fair to state that he made a significant contribution to the success of the project.

1. How effectively did your team work?

The group was composed of 6 members, but I think it is fair to say that the majority of the work was carried out by only three members (myself, Sarra, and Ariel), with a minor contribution from Lyth, who reviewed the regression and clustering tasks produced by Ariel and gave feedback. The three members who were more actively engaged in the project worked well without any particular issues. As mentioned above, Ariel's contribution was significant, and Sarra

Peer evaluation template

also showed interest and engagement in the project. Lyth was the only one who had prior experience in ML, and his feedback was extremely useful for the successful completion of the project.

As mentioned above, Tamim and Hadeel were not actively engaged in the project and did not make any tangible contribution.

2. Were there any behaviours of your team members that were particularly valuable or detrimental to the team? Explain.

Yes, there were both valuable and detrimental behaviours. The valuable behaviours were the active participation in team meetings and work, arriving on time to the team meetings, and being proactive in producing work and responding via all communication channels (WhatsApp and email). The detrimental factors were the lack of participation and the lack of contribution. The most detrimental aspect for the team, in my opinion, was that the individuals who did not participate throughout the project later attempted to compensate for their lack of engagement by limiting their contribution to a review of the final report, without providing anything beyond an email simply stating that it was acceptable. In my view, this does not appear very professional, as it seems to be a way of avoiding full exclusion without making any real contribution. I understand that there were technical issues beyond their control. However, at that point, it might have been more appropriate to withdraw from group work and complete it at a later stage, when full participation across all phases of the project would have been possible.

3. What did you learn about working in a team from this project that you will carry into your next group/team experience?

From this project, I learned the importance of clear communication and consistent engagement within a team. Transparency and regular updates are essential to ensure alignment and avoid misunderstandings. Additionally, this was the first time I had experienced such a situation throughout all stages of the project. This helped me understand how to manage a lack of participation within a group and the importance of adapting to such situations while ensuring that the work was completed effectively. In future group work experiences, I will focus more on proactive communication, clearer task distribution, and better strategies for handling uneven participation.

Peer evaluation template

Self-evaluation

Indicate the extent to which you agree with the following statements, using the same scale shown on the first page. Provide a self-evaluation total.

Contributed good ideas	3
Listened to and respected the ideas of others	5
Compromised and cooperated	3
Took initiative where needed	4
Came to meetings prepared	4
Communicated effectively with teammates	4
Did my share of the work	5
TOTAL	28

My greatest strengths as a team member are:

As a team member, my strengths are punctuality and time management, my willingness to support and collaborate with others in team settings, and reliability. I completed my assigned tasks within the agreed deadlines and ensured that my work was of a high standard.

Peer evaluation template

The group work skills I plan to work to improve are:

I plan to improve my proactive communication skills. During this project, I gained insight into how to manage situations with uneven participation among team members, which helped me better understand team dynamics and adaptability in real projects. In future group work experiences, I would ensure clear communication and more structured task follow-up throughout the project lifecycle.
